

Cold War Science & Tech

WOH 3930-02 | MWF 10:40-11:30 AM
Synchronous Spring 2021

Prof. Ronald E. Doel

What role did science play in the Cold War? What did Americans know about Soviet advances... and vice versa? How did the space age affect world history?

Our aim is to explore how scientists--on both sides of the Iron Curtain--responded to the Cold War. At times they used scientific internationalism to advance détente and reduce tensions. At other times they aided scientific intelligence. Join us in looking at the Cold War in a new way.
