

HIS 6934: The United States and the Cold War

The seminar provides a broad understanding America's experience during the Cold War by examining key issues in that conflict. These issues include: the use of public diplomacy during the Cold War, how oil has affected U.S. foreign policy, Lyndon Johnson's European policy, the diplomacy of Henry Kissinger, America's nuclear strategy, as well as the beginning and the end of the Cold War. The capstone project is a major research paper.
